Subject Index of Volume 38

Acetone
liquid-phase photocatalytic dehydrogenation of 2-propanol with acetone–*cis*-$Rh_2Cl_2(CO)_2(dpm)_2$ system, 279
Acid catalysis
concept of variable active centres in; alkylation of benzene with olefins catalyzed by ion-exchange resins, 365
Activation energy
of electrochemical reduction of oxygen, 71
Adsorption
glucose sensor based on, of glucose on Pd/Au modified carbon electrode, 157
Agarose
p-toluenesulphonyl chloride activation of, as exemplified by coupling of lysine and micrococcal endonuclease, 227
Air-cathodes
bifunctional; catalysis for oxygen evolution in, 41
Alcohol
2-propanol; liquid-phase photocatalytic dehydrogenation of, with acetone–*cis*-$Rh_2Cl_2(CO)_2(dpm)_2$ system, 279
Aldol reaction
asymmetric intramolecular, kinetic analysis of dual catalysis by proline in, 341
Alkanes
methane and other saturated hydrocarbons catalyzed by supported zirconium complex; H/D exchange in, 337
Alkenes, Olefins
concept of variable active centres in acid catalysis; alkylation of benzene with, catalyzed by ion-exchange resins, 365
ethylene; channel network effects in, oligomerization and aromatization using HZSM-5, HZSM-11 and HZSM-48 catalysts; *in situ* ^{13}C NMR study, 387
1,5-hexadiene; highly selective isomerization of, catalyzed by $(R–Cp)_2$-$TiCl_2/R'MgX$; olefin isomerization catalyzed by transition metals, 331
homogeneous catalytic hydrogenation of, using Rh(I) compounds with 2-aminopyridine derivatives as catalysts, 309
mechanism of catalytic oxidation of, by periodic acid in acetic solutions of palladium acetate, 263
p-toluenesulphonyl chloride activation of agarose as exemplified by coupling of lysine and micrococcal endonuclease, 227
Alkylation
of benzene with olefins catalyzed by ion-exchange resins; concept of variable active centres in acid catalysis, 365
Alloys
single crystalline Ga(As, P); photoelectrochemistry of, 115
Ammonium salts
molecular catalysis by quaternary; kinetic analysis of substitution reaction of 4-chloro-3,5-dinitrobenzenesulphonate by azide, 273
Aromatic compounds
2-aminopyridine derivatives; homogeneous catalytic hydrogenation of olefins using Rh(I) compounds with, as catalysts, 309
aromatic *ortho*-substituted azides; five-membered heterocycles by Rh(I)-catalysed carbonylation of, 327
benzene; alkylation of, with olefins catalyzed by ion-exchange resins; concept of variable active centres in acid catalysis, 365
4-chloro-3,5-dinitrobenzenesulphonate; kinetic analysis of substitution reaction of, by azide; molecular catalysis by quaternary ammonium salts, 273
naphthalene; formation of 1,2-naphthoquinone in vanadia-catalysed oxidation of, 383

Aromatization
channel network effects in ethylene oligomerization and, using HZSM-5, HZSM-11 and HZSM-48 catalysts; *in situ* ^{13}C NMR study, 387
Arsenic
photoelectrochemistry of single crystalline Ga(As, P) alloys, 115
Aspergillus niger
immobilized; continuous citric acid production by; reactor performance and fermentation kinetics, 237
Azide(s)
five-membered heterocycles by Rh(I)-catalysed carbonylation of aromatic *ortho*-substituted azides, 327
molecular catalysis by quaternary ammonium salts; kinetic analysis of substitution reaction of 4-chloro-3,5-dinitrobenzenesulphonate by, 273

Brewer–Engel valence-bond theory
advances in electrocatalysis for hydrogen evolution in light of, 161

Carbon
in situ ^{13}C NMR study; channel network effects in ethylene oligomerization and aromatization using HZSM-5, HZSM-11 and HZSM-48 catalysts, 387
electrode(s)
glucose sensor based on adsorption of glucose on Pd/Au modified, 157
influence of background material and layer thickness of sputtered Pd/Au on, for amperometric determination of hydrogen peroxide, 49
Carbon dioxide
oxidation of CO to, by heteropolyacids in presence of Pd, 345
Carbon monoxide
hydrogenation over molybdenum zeolite catalysts, 323
oxidation of, to CO_2 by heteropolyacids in presence of Pd, 345
Carbonylation
five-membered heterocycles by Rh(I)-catalysed, of aromatic *ortho*-substituted azides, 327
Catalyst structure
dioxygen electrocatalysis; mechanisms in relation to, 5
Channel network effects
in ethylene oligomerization and aromatization using HZSM-5, HZSM-11 and HZSM-48 catalysts; *in situ* ^{13}C NMR study, 387
Chromium
Cr(III)/silica gel catalysts prepared from $Cr(H_2O)_6Cl_3$ and $HOCr_2(NH_3)_{10}Cl_5$, 355
Citric acid production
continuous, by immobilized *Aspergillus niger*; reactor performance and fermentation kinetics, 237
Clusters
metal, in homogeneous catalysis; isomerization of methyl linoleate, 315

Dehydrogenation
liquid-phase photocatalytic, of 2-propanol with acetone–*cis*-$Rh_2Cl_2(CO)_2(dmp)_2$ system, 279
Deuterium
H/D exchange in methane and other saturated hydrocarbons catalyzed by supported zirconium complex, 337

Electrocatalysis
advances in, for hydrogen evolution in light of Brewer–Engel valence-bond theory, 161
dioxygen; mechanisms in relation to catalyst structure, 5
heterogeneous, and electrosorption in electro-organic synthesis reactions, 89
Electrochemical reduction
of oxygen:
activation energy of, 71
in sulphuric acid catalyzed by porphyrin-like complexes, 61
Electrodes
bifunctional air-cathodes; catalysis for oxygen evolution in, 41
carbon:
glucose sensor based on adsorption of glucose on Pd/Au modified, 157
influences of background material and layer thickness of sputtered Pd/Au on, for amperometric determination of hydrogen peroxide, 49
polycrystalline TiO_2; RRDE investigation of light-induced cathodic currents at, in presence of dioxygen;

light intensity dependence and cathodic action spectra, 131
titanium anodes; selective catalyst for, 81
Electron transfer reagents
catalysis by, in organic electrochemistry, 203
Electro-organic synthesis reactions
electrosorption and heterogeneous electrocatalysis in, 89
Electrosorption
and heterogeneous electrocatalysis in electro-organic synthesis reactions, 89
Esters
palladium acetate; mechanism of catalytic oxidation of olefins by periodic acid in acetic solutions of, 263

Fuel developments
and precious metals, 27

Gallium
photoelectrochemistry of single crystalline Ga(As, P) alloys, 115
Glucose
glucose sensor based on adsorption of, on Pd/Au modified carbon electrode, 157
Gold
glucose sensor based on adsorption of glucose on Pd/Au modified carbon electrode, 157
influences of background material and layer thickness of sputtered Pd/Au on carbon electrodes for amperometric determination of hydrogen peroxide, 49

Heteropolyacids
oxidation of CO to CO_2 by, in presence of Pd, 345
Hydroformylation catalysts
supported Rh(I)–phosphine; influence of solvent used during radiation grafting on catalytic properties of; γ-radiation-produced supported metal complex catalysts, 295
Hydrogen
advances in electrocatalysis for, evolution in light of Brewer–Engel valence-bond theory, 161
H/D exchange in methane and other saturated hydrocarbons catalyzed by supported zirconium complex, 337
Hydrogen peroxide
influences of background material and layer thickness of sputtered Pd/Au on carbon electrodes for amperometric determination of, 49
Hydrogenation
carbon monoxide, over molybdenum zeolite catalysts, 323
homogeneous catalytic, of olefins using Rh(I) compounds with 2-aminopyridine derivatives as catalysts, 309

Immobilization
continuous citric acid production by immobilized *Aspergillus niger*; reactor performance and fermentation kinetics, 237
Intramolecular aldol reaction
asymmetric; kinetic analysis of dual catalysis by proline in, 341
Iron
dioxygen adducts of iron(II) at surface of MgO–FeO solid solutions, 287
Isomerization
of methyl linoleate; metal clusters in homogeneous catalysis, 315
olefin, catalyzed by transition metals; highly selective, of 1,5-hexadiene catalyzed by $(R–Cp)_2TiCl_2/R'MgX$, 331

Linoleate
methyl; isomerization of; metal clusters in homogeneous catalysis, 315
Lysine
p-toluenesulphonyl chloride activation of agarose as exemplified by coupling of, and micrococcal endonuclease, 227

Magnesium
MgO–FeO solid solutions; dioxygen adducts of iron(II) at surface of, 287
$(R–Cp)_2TiCl_2/R'MgX$; higher selective isomerization of 1,5-hexadiene catalyzed by; olefin isomerization catalyzed by transition metals, 331
Molybdenum
zeolite catalysts; carbon monoxide hydrogenation over, 323

Nuclease
p-toluenesulphonyl chloride activation of agarose as exemplified by

coupling of lysine and micrococcal endonuclease, 227

Olefins: see Alkenes
Oligomerization
channel network effects in ethylene, and aromatization using HZSM-5, HZSM-11 and HZSM-48 catalysts; *in situ* ^{13}C NMR study, 387
Organic electrochemistry
catalysis by electron transfer reagents in, 203
Oxidation
of CO to CO_2 by heteropolyacids in presence of Pd, 345
mechanism of catalytic, of olefins by periodic acid in acetic solutions of palladium acetate, 263
vanadia-catalysed; formation of 1,2-naphthoquinone in, of naphthalene, 383
Oxygen
activation energy of electrochemical reduction of, 71
catalysis for, evolution in bifunctional air-cathodes, 41
dioxygen
adducts of iron(II) at surface of MgO–FeO solid solutions, 287
electrocatalysis; mechanisms in relation to catalyst structure, 5
RRDE investigation of light-induced cathodic currents at polycrystalline TiO_2 electrodes in presence of; light intensity dependence and cathodic action spectra, 131
electrochemical reduction of, in sulphuric acid catalyzed by porphyrin-like complexes, 61

Palladium
oxidation of CO to CO_2 by heteropolyacids in presence of, 345
palladium acetate; mechanism of catalytic oxidation of olefins by periodic acid in acetic solutions of, 263
Pd/Au modified carbon electrode; glucose sensor based on adsorption of glucose on, 157
sputtered Pd/Au on carbon electrodes for amperometric determination of hydrogen peroxide; influences of background material and layer thickness of, 49
Periodic acid
mechanism of catalytic oxidation of olefins by, in acetic solutions of palladium acetate, 263
Phosphorus
photoelectrochemistry of single crystalline Ga(As, P) alloys, 115
γ-radiation-produced supported metal complex catalysts; influence of solvent used during radiation grafting on catalytic properties of supported Rh(I)–phosphine hydroformylation catalysts, 295
Photocatalytic dehydrogenation
liquid-phase, of 2-propanol with acetone–*cis*-$Rh_2Cl_2(CO)_2(dpm)_2$ system, 279
Photocathodic effect
RRDE investigation of light-induced cathodic currents at polycrystalline TiO_2 electrodes in presence of dioxygen; light intensity dependence and cathodic action spectra, 131
Photoelectrochemistry
of single crystalline Ga(As, P) alloys, 115
Porphyrin-like complexes
electrochemical reduction of oxygen in sulphuric acid catalyzed by, 61
Precious metals
and fuel developments, 27
Proline
kinetic analysis of dual catalysis by, in asymmetric intramolecular aldol reaction, 341
Protein modification reactions
transient kinetics of, by an unstable modifying agent, 255

γ-Radiation
supported metal complex catalysts produced by; influence of solvent used during radiation grafting on catalytic properties of supported Rh(I)–phosphine hydroformylation catalysts, 295
Reduction
electrochemical, of oxygen:
activation energy of, 71
in sulphuric acid catalyzed by porphyrin-like complexes, 61
oxygen; RRDE investigation of light-induced cathodic currents at polycrystalline TiO_2 electrodes in

presence of dioxygen; light intensity dependence and cathodic action spectra, 131

Resins
ion-exchange; alkylation of benzene with olefins catalyzed by; concept of variable active centres in acid catalysis, 365
Rhodium
acetone–*cis*-$Rh_2Cl_2(CO)_2(dpm)_2$ system; liquid-phase photocatalytic dehydrogenation of 2-propanol with, 279
Rh(I)-catalysed carbonylation of aromatic *ortho*-substituted azides; five-membered heterocycles by, 327
Rh(I) compounds; homogeneous catalytic hydrogenation of olefins using, with 2-aminopyridine derivatives as catalysts, 309
supported Rh(I)–phosphine hydroformylation catalysts; influence of solvent used during radiation grafting on catalytic properties of; γ-radiation-produced supported metal complex catalysts, 295

Silica gel
/Cr(III) catalysts prepared from $Cr(H_2O)_6Cl_3$ and $HOCr_2(NH_3)_{10}Cl_5$, 355
Spectra
cathodic action, and light intensity dependence; RRDE investigation of light-induced cathodic currents at polycrystalline TiO_2 electrodes in presence of dioxygen, 131
Spectroscopy
in situ ^{13}C NMR study; channel network effects in ethylene oligomerization and aromatization using HZSM-5, HZSM-11 and HZSM-48 catalysts, 387
Sulphur
molecular catalysis by quaternary ammonium salts; kinetic analysis of substitution reaction of 4-chloro-3,5-dinitrobenzenesulphonate by azide, 273
p-toluenesulphonyl chloride activation of agarose as exemplified by coupling of lysine and micrococcal endonuclease, 227
Sulphuric acid
electrochemical reduction of oxygen in, catalyzed by porphyrin-like complexes, 61
Symposium
18th Swedish, on Catalysis; introductory remarks at, 1

Titanium
anodes; selective catalyst for, 81
polycrystalline TiO_2 electrodes; RRDE investigation of light-induced cathodic currents at, in presence of dioxygen; light intensity dependence and cathodic action spectra, 131
$(R–Cp)_2TiCl_2/R'MgX$; highly selective isomerization of 1,5-hexadiene catalyzed by; olefin isomerization catalyzed by transition metals, 331
Transition metals
olefin isomerization catalyzed by; highly selective isomerization of 1,5-hexadiene catalyzed by $(R–Cp)_2TiCl_2/R'MgX$, 331

Vanadia
formation of 1,2-naphthoquinone in vanadia-catalysed oxidation of naphthalene, 383
Variable active centres
concept of, in acid catalysis; alkylation of benzene with olefins catalyzed by ion-exchange resins, 365

Zeolites
carbon monoxide hydrogenation over molybdenum zeolite catalysts, 323
channel network effects in ethylene oligomerization and aromatization using HZSM-5, HZSM-11 and HZSM-48 catalysts; *in situ* ^{13}C NMR study, 387
Zirconium
H/D exchange in methane and other saturated hydrocarbons catalyzed by supported zirconium complex, 337
